## Site Monthly Denominator Form

1. Hospital details	
<b>Hospital name</b>	
<b>Hospital code</b> (country code – hospital ID)	_ _ _ - _ _ _ _

2. Monthly hospital summary data						
<b>Year</b>						
<b>Month</b>						
Variable / Age category	Overall (all ages)	Adult (≥ 18 years)	Child (28 d - <18 y)	Neonate (<28 days)		
<b>Admissions*</b>					<input type="checkbox"/>	Unknown
<b>Patient days<sup>†</sup></b>					<input type="checkbox"/>	Unknown
<b>Average length of stay (days)<sup>†</sup></b>					<input type="checkbox"/>	Unknown
<b>Blood cultures processed<sup>‡</sup></b>					<input type="checkbox"/>	Unknown

### Definitions

**Admissions:** Total number of inpatient admissions to the hospital during the reporting period (\*).

**Patient days:** Total number of patient days of care, i.e. the sum of the lengths of admission of each patient during the reporting period (†).

**Average length of stay:** Average length of hospital admission in days (if “Patient days” are not available).

**Blood cultures processed:** Total number of blood cultures processed for patients from the hospital, excluding cultures processed for external sites / clinics. If a pair of bottles (i.e. aerobic and anaerobic) are sent routinely, then count this as a single culture set (‡).
