Definitions

Admissions: Total number of inpatient admissions to the hospital during the reporting period (*).

Patient days: Total number of patient days of care, i.e. the sum of the lengths of admission of each patient during the reporting period (†).

Average length of stay: Average length of hospital admission in days (if “Patient days” are not available).

Beds (all): Total number of beds in the hospital. If changes occurred during the reporting period, record the average number (‡).

Beds (acute only): Number of beds in the hospital, excluding non-acute wards e.g. long-term care / rehabilitation / psychiatry. If changes occurred during the reporting period, record the average number (**).

ICU beds: Number of high-acuity beds in the hospital (including adult, paediatric, neonatal, and surgical intensive care units). If changes occurred during the reporting period, record the average number (††).

Blood cultures processed: Total number of blood cultures processed for patients from the hospital, excluding cultures processed for external sites / clinics. If a pair of bottles (i.e. aerobic and anaerobic) are sent routinely, then count this as a single culture set (‡‡).
